SKILLS

- **Languages:** C++, C, Python, HTML, CSS, SQL, JavaScript
- **Frameworks:** NumPy, Pandas, Scikit-Learn, React, Node.js, Express.js, Tailwind, Bootstrap
- **Tools/Platforms:** Power BI, Git, Postman, Figma, Netlify, DevOps, Docker, VS Code
- **Databases:** MySQL, MongoDB
- **Soft Skills:** Problem-Solving Skill, Quick Learner, Adaptability, Team Management

PROJECTS

- **Neural RAG — Flask RAG LLM Application - [GitHub](#)** February 2026
 - Developed a full-stack document chat app where users can upload PDFs/DOCX files and have intelligent conversations with their own content, powered by Flask and Google Gemini 2.5.
 - Built a custom search engine to find the most relevant documents for each query, along with secure login system, image-based CAPTCHA verification, and saved chat history across multiple sessions.
 - Reduced AI hallucination by 70% by grounding all responses strictly to user-uploaded documents, delivering source-backed answers**Tech:** Python, Flask, SQLite, Google Gemini 2.5 Flash, PyPDF2, Jinja2.
- **AI Dog Training Assistant Chatbot – Full Stack Chatbot Application - [Github](#)** August 2025
 - Built a full-stack AI chatbot using Flask to deliver real-time responses for dog training, health, and behavioral queries with 50% improved response coverage.
 - Designed a visually appealing UI with custom styling and animations, enhancing accessibility and user retention.
 - Improved chatbot response coverage by ~50% through expansion of categorized responses and backend optimization.**Tech:** Python, Flask, HTML, CSS, JavaScript
- **Job Application Tracker – MERN Stack Web App-[Github](#)** July 2025
 - Developed a full-stack Job Application Tracker using MERN stack with JWT authentication, supporting complete CRUD operations and role-based user dashboards
 - Implemented a scalable MERN application for tracking job applications, offering CRUD operations, filtering and user-specific dashboards.
 - Improved job tracking efficiency by 40% through a centralized dashboard that enabled users to quickly monitor application status and decision-making 30% faster.**Tech:** React, Node.js, Express.js, MongoDB, JWT Authentication.

INTERNSHIP

- **Software Development Intern - WorldWin Coder Pvt. Ltd** July 2025
 - Developed and optimized CMS and e-commerce modules, improving performance and usability.
 - Built dynamic frontend components and integrated backend APIs for scalable web applications.
 - Collaborated in a production environment, delivering maintainable and user-focused features.

CERTIFICATES

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate. [view](#) March 2026
- Data Science Professional From [Oracle](#). [view](#) October 2025
- Full Stack Development Training – [CipherSchools](#) (70 Hours). [view](#) July 2025
- Cloud Computing From [NPTEL](#) (IIT Kharagpur). [view](#) April 2025

ACHIEVEMENTS

- **Achieved 3-Star Rating in C++ on HackerRank** July 2025
Demonstrating strong problem-solving and coding skills.
- **Achieved Elite certification in Cloud Computing** April 2025
From NPTEL(IIT Kharagpur)

EDUCATION

- **Lovely Professional University** Punjab, India Since 2023
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.83**
- **Amrit Public School** Uttar Pradesh, India June 2022
Intermediate; **Percentage: 70%**
- **Amrit Public School** Uttar Pradesh, India June 2020
Matriculation; **Percentage: 85%**
